Leak Containment kit

Non-intrusive permanent repair for leakage

Let's shift FPSO Structural Maintenance from
Planned Shutdown to General Maintenance.

Leak Containment kit

Repair leakage without hot works

PINHOLES

Leak pressure up to 10 bars
Defect inspectable at all time

COMPRESSION HEAD AND SEAL

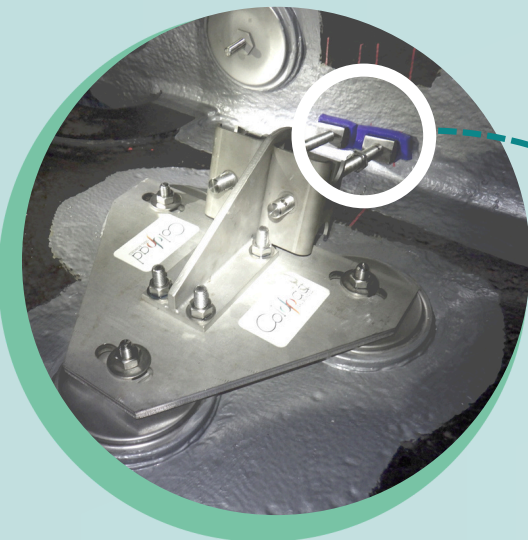

Supplied on diverse shaped and sizes

COMPRESSION SPRING

For sustained effort during all service life

C-CLAW S300

Bonded anchor for secure fastening

Example of a crude oil leak repaired on an FPSI in South-Est Asia

Easy access for inspection : crack evolution can be monitored.

No hot works

Non-intrusive

Inspectable

Permanent repair

Easy and versatile

Leak pressure up to 4 bar

For Hydrocarbons, Water & Gas leaks

Can be immersed in water & oil

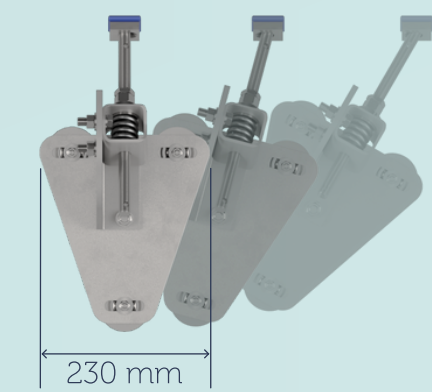

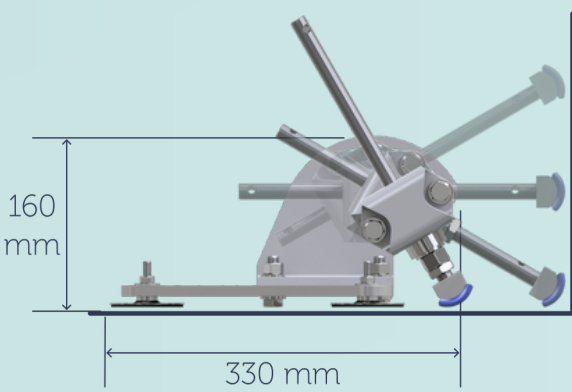

Typical Installation time: 1 day by 1 pax

Adaptable to different geometries

Articulated frame

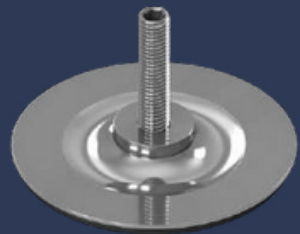

Adaptable for all geometry configuration on flat and curved surfaces or in corners

C-CLAW S300

is a non-intrusive bonded fastener. The alternative to welding, drilling & magnets.

It is a mechanical link between the existing structure and the leak containment kit.
