C-HAWK

Cold Pad installation tools for bonded fasteners

Let's shift FPSO Structural Maintenance from
Planned Shutdown to General Maintenance.

C-HAWK L

Full-Feature installation tool

C-HAWK L is the proprietary tool designed by Cold Pad for the installation of our bonded fasteners. Intended for advanced operations, this tool provides **high-resolution data** during the installation procedure as well a data recorder for tracability.

Control box
To control humidity and pressure data in the bell.

Installation bell
Replicates laboratory conditions to ensure a secure bond in any type of environment.

C-Claw & C-Block
Used to install **ALL** Cold Pad fasteners

C-HAWK S

Compact & user-friendly installation tool

C-HAWK S is Cold Pad next-generation installation tool designed to install medium-duty fasteners. It is light, compact, and **easy to handle** with minimal training.

Installation bell
Replicates laboratory conditions to ensure a secure bond in any type of environment.

Start/Stop
A single button to initiate the bonding process for easy handling.

C-Claw S300 & C-Block C100
For medium-duty applications on steel and concrete

A patented adhesive bonding process to ensure :

Control of pressure for low level of humidity

Repeatable and durable bonding

Laboratory conditions even in harsh environments

For steel & concrete structure applications

Vacuum effect : self portant tools during bonding

Pneumatic and electric version available for both tools

One toolbox : **a complete installation kit.**
