

INTEGRITY
INTEGRATED SERVICE SOLUTIONS

“HEADING TO THE NORTH SEA!”

December 2022 – Aberdeen, UK – Integrity ISS and COLD PAD are proud to announce the signature of a strategic partnership agreement in the UK. The two companies will combine their skills and expertise to create synergies with cold work repair techniques looking after structural repair, maintenance and life extension of industrial assets in the UK.

This partnership particularly intends to create local capacities for the structural repair and modifications of onshore storage tanks and offshore structures. It typically includes the repair of outfitting like pipe supports, handrails, ladders located in explosive atmospheres. It also includes the safe and reliable repair of leakages through non-intrusive and inspectable solutions.

Cold Pad provides durable composite bonding & fastening solutions to facilitate structural maintenance, retrofit & upgrade operations while reducing OPEX by eradicating associated costs. Cold Pad delivers unique, safe, painless, and non-intrusive cold works with limitless applications for all steel and concrete structures, in power generation, offshore wind turbines, shipping and Oil & Gas storage facilities. Cold Pad ambitions to lower the use of materials, manhours and energy from the construction phase to the life extension and decommissioning of structures.

Integrity ISS is a specialist Integrated Service Solutions provider for plant turnarounds, operations and maintenance, plant integrity (find and fix), construction, commissioning and decommissioning projects. The business focusses on safe and efficient delivery of services to support clients to increase plant uptime, improve asset performance and optimise operating expenditure.
